Dollar signs are based upon Average Wholesale Price (AWP) or Maximum Allowable Cost (MAC) and range from one (\$) to five (\$\$\$\$\$), ranking the drugs from least to most expensive. Within the same dollar sign, drugs are listed alphabetically. Dollar signs for maintenance drugs are typically based upon a 30 day supply at a commonly prescribed dosage. For drugs not usually taken 30 days per month, a more appropriate basis is used to determine dollar signs.

**DR**=Delayed-release

**ER**=Extended-release

**IR**=Immediate-release

**NF**=Non-formulary

**ODT**=Orally disintegrating tablets

**SL**=Sublingual
