

Residency Program Overview

PROGRAM GOAL

Upon completion of the Prime Therapeutics Residency Program, residents will be knowledgeable of the roles pharmacists play in the pharmacy benefit management (PBM) industry and be prepared to be a competent contributor to a PBM or managed care organization. During the residency, residents will be a full member of Prime's clinical team with individual and team responsibilities. As such, residents will be expected to perform all assigned job duties including developing and demonstrating professional skills such as time and project management.
