IMPROVING ADHERENCE

Prime solutions

PRIME THERAPEUTICS®

Clinical solutions help connect care and get your employees the medicine they need, when they need it.

Prime Therapeutics (Prime) delivers integration to support adherence and appropriate medication use, help mitigate gaps in care and engage members and prescribers. With these solutions, you'll help improve safety, decrease waste and connect the entire care journey.

TRANSITION FILL

Better experience and adherence potential after a benefit change

Transition Fill provides a temporary fill or refill of a non-formulary drug within the first 90 days of a benefit change, helping to reduce surprises at the point of sale. With this offering, you can help improve your employees' experience and promote better medication adherence.

REDUCED REJECTED FILLS TO
5% AFTER 1 MONTH[1,3]

PA NOTIFY

Efficiency and a better prior authorization experience

PA Notify works to help ensure employees get the medicine they need, when they need it by proactively notifying prescribers (and employees, depending on product configuration) of an expiring drug approval. This solution helps improve employee satisfaction, reduce appeals and grievances and enhance provider efficiency.

SMARTRENEW™

Improved experience

SmartRenew uses past data to proactively renew drug approvals (like prior authorizations and formulary and quantity limit exceptions) before they expire, helping avoid unnecessary gaps in treatment and improving the member experience.

CONTROLLED SUBSTANCE MANAGEMENT PROGRAM

Safety and support for your employees

Prime uses a multifaceted approach to help manage appropriate use of controlled substances. This program improves oversight of people who are at risk for substance use disorder, supports continued research and enhances monitoring of pharmacies and providers. It also provides education for your employees about the risks of controlled substances.

$1500
PMPY potential savings due to reduced health care costs[1]

6.4%
Fewer emergency room visits[1]

GUIDEDHEALTH®

Better medication management decisions

This solution identifies opportunities to improve medication safety and address gaps in care, unsafe use and potential misuse. Leveraging a 360-degree view of an employee's clinical profile, GuidedHealth delivers actionable clinical intelligence to providers, employees and plans via a personalized, omni-channel approach.
